PROFILE SUMMARY

AI Developer and Machine Learning Engineer with hands-on experience in building end-to-end AI solutions across business automation, healthcare, and agriculture. Skilled in Generative AI, RAG systems, SQL generation, multi-agent orchestration, and deploying scalable Python applications using LangChain, Gemini, and modern ML frameworks.

EDUCATION

Pimpri Chinchwad College of Engineering

B.Tech in Information Technology; CGPA: 7.42

Pune, MH

Sep. 2021 – May 2025

EXPERIENCE

Imagin8 Technologies

AI Developer

Onsite

Aug 2025 – Present

Coding Pro

AI & Data Science Intern

Remote

Feb 2025 – Jun 2025

Celebal Technologies

Data Science Intern

Remote

Jun 2024 – Aug 2024

TECHNICAL SKILLS

Python, SQL, Linux, Windows, Ubuntu, VS Code, Git, Github, Machine Learning, Regression, Classification, Linear Regression, Logistic Regression, KNN, Decision Tree, Ensemble Learning, Random Forest, AdaBoost, K-means Clustering, PCA, Feature Selection, Naive Bayes, Hypothesis Testing, Deep Learning, Neural Networks, ANN, CNN, DNN, Transfer Learning, Tensorflow, Keras, PyTorch, Numpy, Pandas, Sci-py, Scikit-learn, Seaborn, Matplotlib, Flask, Streamlit, FastAPI, nltk, Text preprocessing, Text Vectorization, RNN, LSTM, GRU, Transformers, BERT, LLMs(GPT-4o, Gemini, LLaMa), Crew AI, HuggingFace, LangChain, Langgraph, RAG, Prompt Engineering, Vector Databases (FAISS, ChromaDB, Pinecone).

PROJECTS

AgenticQuery | *LangGraph, LangChain, Gemini, SQL*

[See Project](#)

- Developed an intelligent SQL agent that translates natural language questions into complex MySQL queries using LangGraph orchestration and Gemini 2.5 Flash. Implemented a self-correcting workflow that automatically retries failed queries and validates data accuracy through a multi-agent architectural loop.

SBI Loan AI Assistant | *RAG, LangChain, LLM, ChromaDB, Gen AI, NLP, Streamlit*

[See Project](#)

- Slow and manual information retrieval across 9+ complex banking documents led to frequent information gaps and poor customer experience.
- Developed a RAG pipeline using Gemini 2.5-Flash, LangChain, and ChromaDB, implementing Hybrid Search and FlashRank re-ranking to ensure precise context retrieval.
- Achieved 100% cited accuracy, reduced lookup time by 85% (i2s), and delivered a 3x improvement in capturing granular loan details.

Agri Help | *Python, ML/DL, Transfer Learning*

[See Project](#)

- Designed and developed an AI-driven web platform using Ensemble ML model and transfer learning models like resnet50 and mobilenetv2 on real time data with Data Handling. Achieved great accuracy in crop and fertilizer recommendation also in disease, pest classification. Built with Python, Flask, Node.js, React.js, MongoDB, TensorFlow and deployed on Render and Vercel. Enabled real-time agricultural predictions through a user-friendly UI, OTP-secured login and cloud-hosted inference APIs.
